

# PEC's Contractor Management Solutions

## Technology backed by Safety

PEC is an industry-leading safety company that helps companies manage their safety compliance mandate. Our mission is to help bring workers home safe from high-hazard jobs.

We offer a contractor management solution that provides a critical compliance software enabling companies to hire and manage safe and qualified contractors. Unlike our competitors, **PEC's software is backed by a team of safety professionals**. Over **100 owner clients/operators** in the United States, across several industries, turn to PEC for a contractor management solution. There are over **15,000 contractors** who provide information in our system.

### Collect

We collect critical data needed to evaluate contractor qualifications through our easy-to-use online platform, Compliance Pro.

### Verify

We verify contractor-reported data, including general incident statistics, safety statistics and insurance coverage to ensure contractors meet critical requirements.

### Hire

You can hire with confidence knowing that your contractor workforce meets the safety and organizational requirements your company demands.

# Why PEC?

We have expert safety professionals personally auditing each Standardized Safety Questionnaire, rather than a simple visual computer review. We identify gaps in coverage and work side-by-side with contractors to correct those deficiencies, ensuring a safer workplace for all. With PEC, you can feel confident knowing that our technology is backed by safety professionals.

## System Capabilities and Benefits

Service Feature	Benefit	Outcome
<b>Complete Customization</b>	PEC's Compliance Pro software is completely configurable to meet your specific needs, gathering only relevant data	<b>Streamline data collection</b>
<b>Expert Verification</b>	Our expert-led insurance verifications identify high-risk contractors, allowing you to find qualified contractors in new areas or replace at-risk employees in current locations	<b>Save time, find qualified contractors</b>
<b>Safety Program Evaluations</b>	PEC identifies high-risk contractors and makes recommendations to help increase their safety compliance	<b>Track and evaluate contractors</b>
<b>Reporting</b>	System reporting capabilities give clients the ability to rank contractors based on location, functions and more	<b>Identify high-risk contractors</b>
<b>Document Uploads / Archiving</b>	Our system collects contractors' documents, and all uploaded documents are archived for six years	<b>Save time, save manpower</b>
<b>Best-In-Class Customer Service</b>	Our safety and support teams personally respond to all your needs	<b>Direct access to support</b>
<b>Contractor Ranking</b>	We provide a color-coded safety compliance ranking of your contractors, which allows you to identify high-risk contractors and focus your efforts in the areas of greatest risk	<b>Quickly evaluate the safety of your contractor workforce</b>

# Why choose PEC?

## Improve Safety Statistics

PEC's contractor management solution has been proven to improve statistics like TRIR, DART, and EMR to create a safer workplace. Contractors in the PEC system had an average **47% lower** TRIR rating than those not in the PEC system.

Contractors in PEC	Contractors in PEC System	Industry TRIR Average
have <b>47%</b> <i>lower TRIR than the Industry TRIR average</i>	<b>TRIR 0.77</b>	<b>1.13</b>

## PEC's Safety Program Evaluations

We provide Safety Program Evaluations on all subscribing contractors, and can conduct further audits to identify and flag contractor compliance risks.

**Safety Program Evaluations (SPE):** Each contractor's initial evaluations are performed by our safety team upon system subscription or renewal. Safety Experts evaluate compliance to regulatory requirements and flag deficiencies to contractors.

**Face-to-Face SSQ Verification:** In-person or webinar system review of safety compliance, concluding with a safety compliance improvement plan.

**HSE Management Program Audit:** In-person HSE Program review which includes reviews of written policies, employee interviews, and observation of in-field safety practices.
